

200 Series Valves

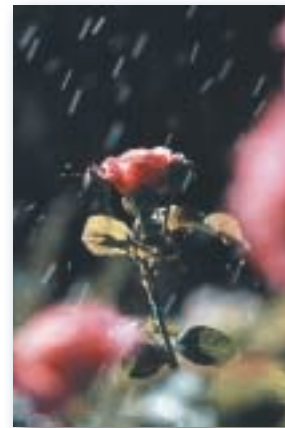

When you need a hard-working electric valve to handle your toughest jobs, it makes sense to use Orbit's 200 Series Valves. Precision-engineered and built to last, Orbit's 200 Series valves feature heavy-duty diaphragms that exceed industry standards for strength and durability.

Because Orbit's 200 Series valves are tested and tried under the harshest conditions, you can rest assured knowing that you're getting the greatest value, accurate water flow, and the best variety of valves that deliver years of trouble-free performance.

Applications: Light commercial and custom residential projects.

Options: Available in 3/4" and 1" sizes, with or without flow control, threaded or solvent weld.

Outstanding Features:

- Balanced flow design keeps equal pressure on both sides of the diaphragm while the valve is off, effectively increasing the valve's durability.
- Self-cleaning pilot-flow 90 mesh (200 micron) filter.
- Internal bleed lever makes manual "at the valve" operation easy and spray-free.
- Molded with heavy-duty ultraviolet light-resistant poly vinyl chloride (PVC).
- "Quick-slip" glue joint model available for fast, clean installation.
- Heavy-duty, stainless steel spring and external bonnet screws.
- Easy to use vandal-resistant flow control stem allows flow regulation at the valve.
